Component	Details	Comment	Marks Awarded	Marks Available
Design	Does the design provide a framework for implementing a number of different players?	Although given in text rather than diagram form, the design is clear.	10	10
	Are the players themselves well-designed: is it clear from the design how the players decide on their moves?		10	10
Implementation	Is the code **functional**, able to play a game of dominoes? (Even if it doesn't play it well, so long as there are at least two players that differ from each other and the provided players.)		20	20
	Is the framework **well-coded**, using good functional style?	Inefficient but effective	5	10
	Is the code **well-presented**, using clear and consistent layout, with good choice of function and parameter names?		10	10
	Is the code **well-documented**, with comments *where necessary* ? Remember, you should aim for code that is largely self-explanatory. Do not write comments that are not necessary, but *do* comment code that is not self-explanatory.		10	10
Results	Are there comparative results for the players?	Yes	10	10
	Are there clear differences in the results, with a clear explanation?	Clear differences but not explanations	5	10
	How smart are the players? How much knowledge about the game do they capture?	Well done	10	20
